

ColorWave™ CONCRETE STAIN

Water Based For Interior & Exterior Applications

ColorWave™ is a penetrating water-based stain specifically formulated to stain concrete or other cement-based materials, by delivering ultra-fine pigments into the surface. ColorWave™ works on cured concrete that is colored or uncolored. Colors may be combined for unique results. Variations in color may occur from slab to slab and colors shown below are sealed. Application tests on a small area is recommended. To ensure long-term durability, Direct Colors™ offers a complete line of compatible cleaners, sealers and wax polish.
