

ProClean Neutralizer™ Concentrate How-To Guide

Step 1: Preparation

- Cover areas at risk of over-spray with plastic drop cloth.

Step 2: Application

Coverage rate is approximately 200 square feet per gallon. Coverage rates may vary based on concrete texture, surface porosity, and application method.

NOTE: Only apply ProClean Neutralizer™ when surface temperature is above 40°F (4°C).

Caution: May be harmful if swallowed or ingested. Contact with skin can cause mild irritation. Avoid contact with eyes.

Mixing:

- Mix Ratio: 4 ounces of ProClean Neutralizer™ Concentrate to one gallon of water
- Remove all filters from pump-up sprayer.
- Pour ProClean Neutralizer™ into pump-up sprayer.
- Pour water into sprayer.
- Tightly seal the lid and shake vigorously for 20 seconds.
- Allow the ProClean Neutralizer™ to sit for one minute before applying.

Spraying:

- Wear spiked shoes.
- Spray ProClean Neutralizer™ on entire surface (let soak for 15 minutes).
- Scrub surface with a scrub brush or low-speed floor buffer with brush attachment.
- Pick up residue with a wet-dry vac (cotton mop may be used, but will not be as effective).
- Immediately rinse surface with water until surface is clear of residue.
- Dry for at least eight hours before applying a sealer.

Pro Tips:

- Break larger areas down into manageable zones (200-400 square feet), allowing enough time to finish neutralizing surface before solution dries.

Cleanup:

- Clean tools and supplies with ProClean Degreaser™ and warm water.

ProClean Neutralizer™ Concentrate How-To Guide

Tools & Supplies:

- Pump-up sprayer
- Spiked shoes
- CleanPro Degreaser™
- Scrub brush or low-speed floor buffer with brush attachment
- Wet-dry vac or mop and bucket
